

Small Spaces

A small storage closet turned into a children's area. Mural on the wall, a wooden castle, puppets, games, and puzzles for all!

Children's Space

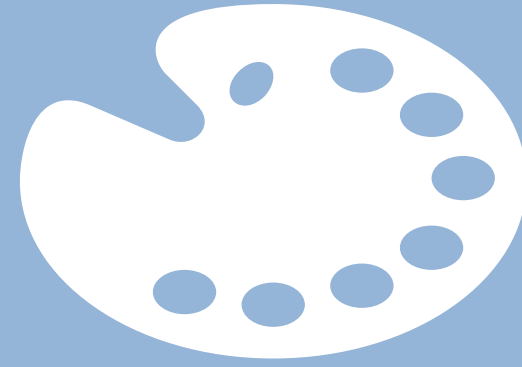

Small displays placed on and around the circulation desk draw students' attention.

Display

A book cart filled with the elements of STEAM on both sides. The younger students love it!

Makerspace

A multipurpose children's couch, wobble seats, floor desks, a moveable adult couch, bean bags, and lounge pillows are great.

Modular Seating

YOUR SPACE

A warm, cozy environment that many people can relax or study in, even if it's small.

Relaxation

An electric fireplace, a fountain, quiet music, lamps, rugs, pillows, and blankets make for a cozy library.

Shelving

Compact shelving can be used to create spaces for study, especially when used with modular furniture.

Small-Space Seating

2' wide café tables, chairs down both sides of a narrow table, and carefully placed furniture create plenty of seating for students.

Studying

Sound muffling headphones make studying in a crowded environment easy. Multi-headphone adaptors let multiple people use one computer.
